Three of my small group clients bound together to make their newsletters super powerful. I couldn't be more excited. The team took my articles, a few images and the names of the three companies and turned it into 3 emails caught my attention right off the bat. The clever layout, fun narration, and superb copywriting had me begging them to book more of my time. We put together a newsletter template, added some video, added a Google map, and began messaging the customers and letting them know they were getting the special deal. The results have been great. For a few weeks after the campaign, I kept getting told how great it was and how they liked the offer. Yippee!! On the 12th of April my rate stayed the same for 2 months. I see an uptick again this week. I should make myself a deal on that....a brilliant advertising campaign that will last at least through the end of the year.<?php /** * Zend Framework * * LICENSE * * This source file is subject to the new BSD license that is bundled * with this package in the file LICENSE.txt. * It is also available through the world-wide-web at this URL: * http://framework.zend.com/license/new-bsd * If you did not receive a copy of the license and are unable to * obtain it through the world-wide-web, please send an email * to license@zend.com so we can send you a copy immediately. * * @category Zend * @package Zend_Service * @subpackage DeveloperGarden * @copyright Copyright (c) 2005-2012 Zend Technologies USA Inc. Adobe Photoshop Elements is a good introduction to Photoshop, and you can even work in the more professional features of the software using Photoshop Elements. For photographers, graphic designers and anyone using Adobe's products, Photoshop Elements will take you straight to the heart of the Photoshop user interface. Until the development and release of the Creative Cloud, Photoshop came bundled with Photoshop Lightroom. Elements is a standalone application only, and the two are not directly compatible. However, Photoshop Elements can now import, analyze, edit, and work on Photoshop Lightroom catalog exported images. The final piece in the 100$ Picture Pack is the Speaker's Image feature. When the red dot shows on an image, it means that your target photograph is already taken. This is great for people who have a gallery on their phone and want to edit it, but don't have access to any editing software, like Elements. The other neat feature is the ability to tell Elements to crop the image into different shapes. Each shape has five preset shapes, and you can also change the size and orientation of one of the preset shapes, which makes the comparison process simpler. To get that little extra, you need to subscribe to the Adobe Picture Pack for $99(Rs. 1699).
